

Safeguarding your Personal Identifiable Information

eSpyder is a eDiscovery software solution which has been developed from the ground up to support the GDPR and other global privacy regulations.

It is uniquely aimed at the Data Protection Officer and their requirements of their role. eSpyder offers 360° visibility on where data is held and effectively supports management of Access Requests with no IT resourcing requirement once installed.

Priced competitively to suit medium and large organisations alike, while offering flexible deployment options and a small IT footprint to fit a company's IT preferences.
